

Figure 1 consists of 12 scatter plots, labeled (a) through (l), arranged in a 4x3 grid. Each plot shows the relationship between the number of children (x-axis, 0 to 10) and the number of children not in the household (y-axis, 0 to 10). The plots show a general downward trend, indicating that as the number of children increases, the number of children not in the household tends to decrease. The plots include various statistical measures such as R-squared, F, and t-values.

| Plot | R-squared | F    | t    |

| (a)  | 0.10      | 1.00 | 0.32 |
